Finding Aid for the THEATRE HISTORICAL SOCIETY NEGATIVE COLLECTION

Acc No.:

Future Additions Expected: No

Finding Aid creation: October 27, 2015

Size: Approximately 16.3 linear feet

Abstract

The Theatre Historical Society Negative Collection consists of approximately 16.3 linear feet of photographic negatives. The collection consists of approximately 7,400 negatives documenting over 1,740 theatres in the United States as well as some international theatres and a number images of organs, organists, and theatre related personalities.

Background Information

The Theatre Historical Society of America was founded in 1969 to promote the legacy of America's historic theatres and ensure the documentation of the architectural, cultural and social history of those theatres. Materials were collected by members and kept in separate locations. Over time the collections were brought to one location and combined. From these initial collections the materials were organized and separated into several different collections. Records detailing histories of specific theatres were labeled the Theatre File, materials containing information on theatre mechanics, cinema chains, architects, THS members, vaudeville circuits, among other topics became the Subject Files, Photos that were used in the publication of Marquee were gathered into the Editors Collection, photographic slides, postcards, and negatives became the THS Slide Collection, THS Postcard Collection, and THS Negative Collection respectively. These collections came from THS members and donations made throughout the organization's history.

The negatives in this list came from a collection that had been assembled over the years by Brother Andrew Corsini. Many of these negatives are from private collections donated to THS. In some cases there are duplicate negatives from the [Chicago Architectural Photographing Company](#) collection. It should be noted that some negatives are of questionable quality and unknown provenance.

Scope and Contents Note

The THS Negative collection consists of 16.3 linear feet, approximately 7,400 negatives stored in envelopes inside archival boxes. The negatives are organized geographically by country, state, city then by theatre. This listing originated from a paper index compiled by THS volunteers under the direction of Archive Administrator William Benedict, last updated in 1992.

The negative collection is separated into two groupings based on size. The small negative collection comprises negatives measuring 4"x5" and below. The large negative collection is made of negatives ranging in sizes larger than 4"x5" and typically no larger than 8"x10".

Item identification numbers begin with the two letter state postal code and then organized alphabetically by city and then theatre name, indicated by sequential numbers. The ID of the Orpheum in Duluth, MN is - MN 1, the next alphabetical negative in the collection is the Bijou in Minneapolis, its ID is - MN 2. Later additions were filed in by adding a letter to the end of the ID. By example the Lyceum in Duluth was given the ID - MN 1A.

Negatives came from multiple sources; the known sources are indicated in parentheses in the negative identification number. Sources are as follows -
