## Finding Aid for the THEATRE HISTORICAL SOCIETY POSTCARD COLLECTION

Acc No.: various  
Future Additions Expected: Yes  
Finding Aid creation: November 3, 2015  
Size: 7 boxes, approximately 4.75 linear feet

### Abstract

The Theatre Historical Society Postcard Collection consists of approximately 4.75 linear feet of postcards. The collection consists of 3,370 postcards documenting theatres in the United States as well as some international theatres and a number of street scenes, amusement parks, ballrooms and other buildings.

### Background Information

The Theatre Historical Society of America was founded in 1969 to promote the legacy of America's historic theatres and ensure the documentation of the architectural, cultural and social history of those theatres. Materials were collected by members and kept in separate locations. Over time the collections were brought to one location and combined. From these initial collections the materials were organized and separated into several different collections. Records detailing histories of specific theatres were labeled the Theatre File, materials containing information on theatre mechanics, cinema chains, architects, THS members, vaudeville circuits, among other topics became the Subject Files, Photos that were used in the publication of Marquee were gathered into the Editors Collection, photographic slides, postcards, and negatives became the THS Slide Collection, THS Postcard Collection, and THS Negative Collection respectively. These collections came from THS members and donations made throughout the organization's history.

### Scope and Contents Note

The THS Postcard collection consists of 4.75 linear feet, numbering 3,370 postcards. The postcards are organized geographically by country, state, and grouped into folders by city. City folders may contain multiple theatres or street scenes. The folder listing below indicates the number of postcards and the individual theatres represented. Folders may contain duplicates of postcards.

The postcards range in size from 3.5" x 5.25" and larger. All postcards are housed in 5.25" x 7.25" transparent archival sleeves. Several items in the collection are booklets featuring multiple postcards.

The collection dates back to the late 1800's. Items were dated using post marks and the design of postcards to approximate a date range in which it was produced. Not all postcards were dated, therefore that information was not included in this finding aid but available, however the ones that are dated and those dates are noted in records that can be viewed in THS's [online catalog](#). Postcards in this collection were produced using a number of different processes as the medium evolved. The collection includes real photo postcards, photochrome, chromolithography, and halftone printing processes among others.

Previous work with collection included tagging individual postcards with an ID numbers. This was not uniformly completed so grouping by city was deemed sufficient for processing for the time being. Identification of individual postcards may be completed in the future.

The postcards came to THS from a number of different sources. The following is a list of persons who donated postcards to THS that appear in this collection. Due to the unknown provenance of some of the postcards the complete list contributors is unknown.
